The New Lightspeed Version 6.0.137 is now available for download on the Lightspeed Trading Website.

How do I download the version?

Go to the Trading Software Page on the Lightspeed Trading Website to download the latest version of Lightspeed.

What changes should I look for?

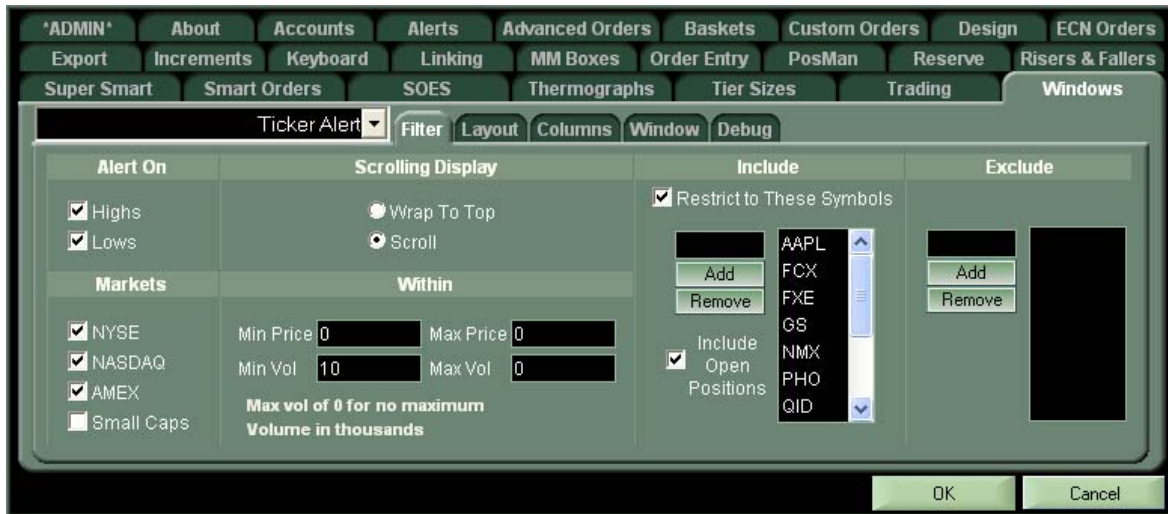

New Stop Orders: Lightspeed now has the ability to send STOP orders in Listed AND Nasdaq symbols to a new destination: “Automated Trading Desk (ATD).” These orders are STOP Market Orders and will be executed when your price is at the inside market.

Note: These orders are not triggered by trades so they should not be subject to erroneous or late prints.

Map the StopBid and StopOffer Keys seen in the Keyboard Tab or use your Order Entry Window, seen below. If you select STOP from the “Type” Dropdown in the Order Entry Window, be sure to select STOP as the Market if you would like the orders to go to “ATD.”

New Ticker Alert Settings Window: Use the new settings window, seen below, to set up your High Low Ticker how you prefer.
