Or upgrade to latest version from the About tab, as seen below:

Clicking the above button will download the latest version of Lightspeed Trader to your Desktop. Log out and run the install at your convenience.

## What changes should I look for?

### Customize Level 1 Section of Option L2

Add Option and Underlier information. Right click to change spacing between rows. Double click to rename fields.

## Create Commands for Options

**\* Commands will trigger an order in the option in your focused Option Level 2**

Right click on the Option Level 2 and select "Commands" to create your new option commands.

Select a Side

Select the Order Quantity when you have a position to close and when you do not

Select if you would like the Command to populate the Order Ticket in the Option L2 or go right out to Market

Select the order properties, Market, Order Type and Time in Force

Set the price of the Order

Name the Key and Select Add

## Map Custom Option Commands to the Keyboard (or a Hot Button Window)

**\* Commands will trigger an order in the option in your focused Option Level 2**

Once these commands are created in the tab seen above, users can now map them to a Keyboard or Hot Button window. Seen below in the Keyboard Tab:

- 1 Select Custom Commands to Choose from the Option Commands you have Created

2 Select the Option Command you would like to Map

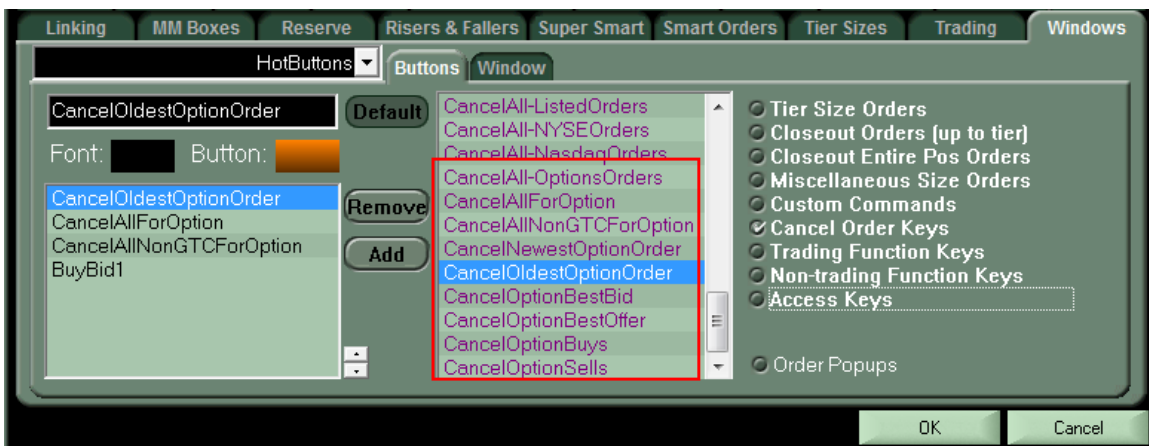

3 Select the Location on your Keyboard

4 Click Map

**Predefined Option Cancel Commands now available for your Keyboard or Hot Button Window**  
**\* Commands will trigger an order in the option in your focused Option Level 2**

Seen below in the Hot Button Window configuration screen, new Cancel Commands Include:

- Cancel All/All Non-GTC for Option
- Cancel Oldest/Newest Order for Option
- Cancel Best Bid/Offer for Option
- Cancel All Buys/Sells for Option

**Use the Keyboard to Toggle the Order Parameters in your Focused Option L2**

After sending a command to the Order Ticket, users can use the keyboard to toggle order parameters in the Option L2 Order Ticket. Left-Right will toggle Price, < > will toggle Quantity, Up/Down will toggle the Market.

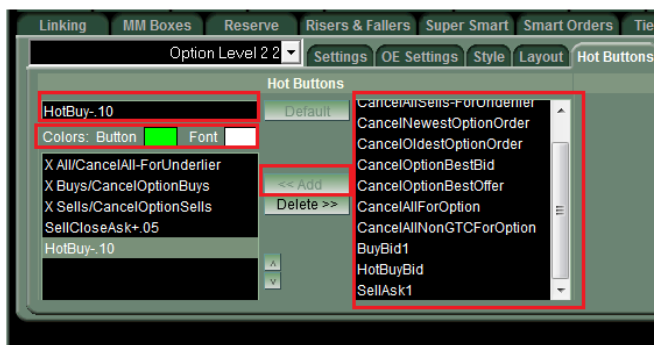

Left. Right and < > Toggle will match the Increments set in the Increments Tab (Size/100 for Quantity).

**Add Commands or Cancel Commands to Hot Button Pane in Option L2**

A Hot Button pane has been added to the option Level 2 window. Right click on the Option Level 2 and select "Hot Buttons."

Choose from your custom created option commands or our predefined option cancel commands and select Add.

Rename the button, select a button color, or font color.

## Position Delta, Gamma, Rho, Theta, and Vega Columns for Position Window

Will display the total for each position individually.

## Underlier Position Delta, Gamma, Rho, Theta and Vega Columns for Position Window

Calculates the total for all positions in the Underlier.

## Level 2 and Option Level 2 Mirrored Display

Right click on the Level 2 and select Level 2 Settings. When the box seen left is checked, your Level 2 and Option Level 2 columns will display in a mirror format, seen right:

The image shows a settings dialog on the left and a market data window on the right. The settings dialog, titled 'Level 2 Information - Columns, Font and Color', has a checkbox for 'Mirror column display for Bid / Ask' which is checked. The market data window shows a mirrored Level 2 display for SPY on the ARCA exchange. The data is presented in a grid format with columns for quantity, market maker, bid price, ask price, market maker, quantity, and order type.
