

SUBJECT: LIGHTSPEED TRADER VERSION 8.2.708

DATE: 10/18/2023

The New Lightspeed Trader Version 8.2.708 is now available for download.

How do I download the version?

Visit our website to download the latest version of LST.

What are the changes in this version besides general optimizations?

Platform

Default to closing mode only when connection to Config Server has been lost.

- Orders will be rejected with "No Config Session--Closing Orders Only".

Options Most Active

- Implemented highlighting

Positions

- Right-Click Menu, Closeout will include Account name.
- Support flat index positions so index sum rows can show the underlier sums.
- Make positions rows update on account change in chain.
-

Chart

- Chart Fibonacci Lines, display Fibonacci level percent on left of line.
- Chart Fibonacci Lines, additional retracement and extension levels, all levels now optional and with solid, dotted and dashed choices.
- Chart, make the shading and lines separating premarket, market, post market more distinct.

Config Menu

- Trading Tab Warnings, now Equity and Options have separate values for all warnings.
- Trading Tab Warnings, new Volume warning.
- Added a \$ Amount size type to Equity custom orders to mirror the new Option Command size type.
- Move the column sort dropdown to below the delete button.

Option Chain

- Double-click to execute OptionL2 Commands, also with a new confirm for these Chain Orders.

Headquarters

20 Headquarters Plaza North Tower 7th
Floor Morristown, NJ 07960
1.888.577.3123

FINANCIAL SERVICES GROUP

- Mirrored Columns mode.
- Increase spinner number of strikes from 10 to 30.
- Chain, renamed Value Delta to Position Dollar Delta
- Darken In/Out Money shading and add green/red brackets to term columns.
- Split the option chain double-click command into 3--bid, ask and other.
- Make chain add-row accept Inside column as the option L2 commands do now (left side is bid, right is ask).

Option Chain/Positions/Watchlist columns

- Position Premium
- Underlier Position Premium
- Lambda
- Delta \$
- Delta %
- Theta %
- TW Vega
- Position Delta \$
- Position Delta %
- Position Theta %
- Position TW-Vega
- Underlier Position Theta %
- Underlier Position Delta \$
- Underlier Position Delta %
- Underlier Position TW-Vega

Option Level 2

- Default Call or Put choice.
- Ability to choose command for Chain double click action.
- New command price targets:
 - Last
 - Prev Close
 - Position Price
 - Position Cost Basis
 - Position Price %
 - Position Cost Basis %
- New command quantity targets:
 - % Total BP
 - % Avail BP
 - Dollar Amount
- Add an In/Out Money I1 field to the OL2--"ITM".
- Make Default Call/Put a per-window config.

Headquarters

Floor Morristown, NJ 07960
1.888.577.3123

Main Menu

- SMA windows now renamed to CA.
- New CA Earnings Watcher Window.

Debug

- Fix window copying/cloning.
- COE default strike doesn't choose a grayed-out strike (even if it is closest to money)
- Chain selection of a non-standard root still saves when typing up different underliers, but those different underlier will display Standard contracts.
- Chain, fix the shading of In/Out of money to be based on Adjusted underlier price.
- Chain, fix the renaming of columns in chain Columns config dialog.
- Chain config, "Show In/Out Money Brackets" to hide the new colored brackets around the term pane.
- COE default strike doesn't choose a grayed-out strike (even if it is closest to money).
- Chain selection of a non-standard root still saves when typing up different underliers, but those different underlier will display Standard contracts.
- Chain, fix the shading of In/Out of money to be based on Adjusted underlier price.
- Chain, fix the renaming of columns in chain Columns config dialog.
- Chain config, "Show In/Out Money Brackets" to hide the new colored brackets around the term pane.
- Fix Option L2 Config, Commands, Chain DClick boxes.
- Fix quantity config in various custom commands.
- Fix Custom size config when selecting quantity with position.
- Fix watchlist sort.
- Fix the Dollar Amount calc in OI2 commands (divide by a contract multiplier).
- Options spread trading ratios
 - LST will reconcile the partial fills on option legs to match the ratios in order to properly calculate the margin required. (Previously treating short options in spreads as naked options for margin and removed more BP than it should have and in some cases causing BP to go negative).
