

TO: LIGHTSPEED TRADING TRADERS
SUBJECT: CREDIT SUISSE AES "CROSSFINDER +" ACCESS IN LIGHTSPEED TRADER
DATE: 4/18/2017

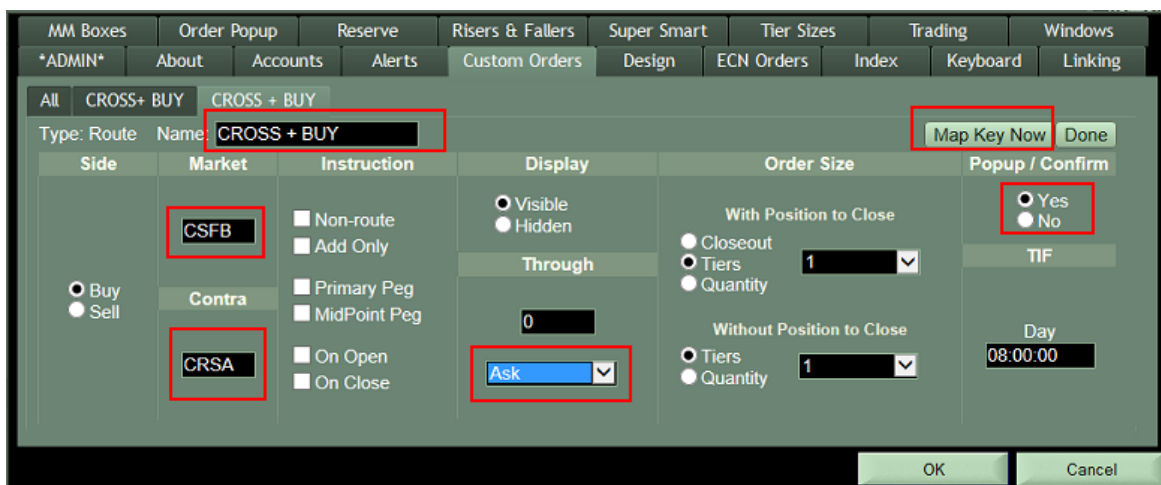

Lightspeed Trader has connectivity to Credit Suisse AES Crossfinder-Plus. Crossfinder+ is the Credit Suisse AES smart dark router that contains dynamic smart routing logic to direct your order to the destinations with the most liquidity in the name that you are trading. Crossfinder+ orders are never displayed out loud and Crossfinder+ can be used in 3 different modes:

- CRSN - Normal mode, executions will be at the midpoint of the NBBO or better.
- CRSP - Patient mode, executions will capture the full spread.
- CRSA - Aggressive mode, executions will cross the spread.

To access this route you may request one or all of the 3 Crossfinder+ Order Types be added to your Order Entry Window to select from the Type dropdown, seen here:

This route can also be accessed by adding a new Custom "Route" in the Custom Orders Tab, with the acronyms CSFB in the Market field and CRSA, CRSN, or CRSP in the Contra fields, as seen below:

Once you have created the Route you can map it to a Hotbutton or any Key, via your Keyboard Tab.

For pricing refer to our online table at <https://www.lightspeed.com/pricing/routing-fees/>
