About This Document

This User Guide details how to use Lightspeed Web & Mobile. It describes various components and windows of the platform and explains their purpose and functionality, defines and explains procedures for trading, and highlights some ways to personalize the platform. Please note that all information provided in this document is subject to updates by Lime Brokerage.

Getting Started

To access Lightspeed Web & Mobile, point your browser at the URL: https://secure.lightspeed.com/ and enter your login credentials.

Upon successful login you will see "My Platforms" and a link to Lightspeed Web & Mobile. Click the link and you will be redirected to the trading platform.

Dashboard

When you first login to Lightspeed Web & Mobile you will see the default layout:

C Underneath the marquees bar is the tabs bar which allows you to add or remove tabs, and fill each tab with widgets of your choice using the "Add Widget" dropdown menu.

Icons & Symbols

Lightspeed Web & Mobile has several icons and symbols for navigating the platform and personalizing the layout. Several buttons that are grouped in the top right corner of the platform are described in the next section. Other buttons that show up throughout the platform are described in the table below.

ICON	NAME	NAME						
C	Log Off	Sign out from your Lightspeed Web & Mobile account						
? 🔜 - () ∓ ि∎ 🛠	Settings	Edit and make changes to the platform interface (ex: account, trading accounts, layout settings, personalization)						
Account 🛱	Tab Settings	Add more tabs, name/rename tabs and delete tabs						
Ø ✿ □ ×	Widget Settings	Enable you to edit and customize the widget (settings differ from one widget to another)						
Ð	Add Tab	Enables you to add extra tabs to the platform						
1	Manage Columns	Enables you to select the columns you want to keep and remove in widgets						
+	Create New Watchlist	Enable you to create and add new Watchlists						
Ŵ	Delete Current Watchlist	Enables you to delete current Watchlist						
	Marquee Settings	Enables you to edit the display of real time quotes of securities						
—	Pinned Header Panel	Enables you to pin header panel						
- H	Unpinned Header panel	Enables you to unpin header panel (Marquee listing and widget						
A	Locked Layout	panel) Enables you to lock your last update layout. When you lock your layout, you cannot add and/or delete any of the changes made						
Ъ	Unlocked Layout	Enables you to unlock your layout and make edits by adding, deleting and relocating the widgets within the platform						
?	Help Button	Enables you to report any question, feedback about the platform						
-	Language	Enables you to change the language of the platform features						
	Group	Enables you to assign widgets to the same color group so you can connect all widgets together by one click						
	Maximize	Maximize the widget window						

Platform-level Setting & Layout Control

Top-right corner of the Lightspeed Web & Mobile contains several important navigational and settings related buttons:

- A Send Message to Support or click on a web link to a user guide or video.
- B Send a message to support
- C Change Platforms Language (English, Russian, Chinese or Taiwanese)
- D Log Out
- E Pin Header Panel
- F Lock Layout (Hides close window buttons and Add Widget dropdown menu)
- G User Settings (See more in the next subsection)

User Settings

User Settings button enables you to customize your layout. If you click on the settings wheel button, a window with five tabs will popup.

Profile Tab

Allows you to modify the Time zone and update personal settings

User Settings (cont'd)

Trading Accounts Tab

Allows you edit how the account is displayed on the status bar.

Trading Tab

Allows you edit how the account is displayed on the status bar.

Default Order section allows to set default order type (Market, Limit, Stop, Stop Limit), order duration or TIF(Time in Force) with DAY and GTC options.

Default Quantity section allows to set default number of shares for stock orders and default number of contracts for option orders.

Quick Trading has Price Increment Multiplier where you can modify the price on open orders by clicking the scroller next to the limit or stop price. In the order verification window that will pop up, the new price will differ from the original one by the \$0.01 times the multiplier. If your multiplier is 75, the new price will differ by \$0.75.

User Settings (cont'd)

Layout Settings

Allows you to Customize several of your platforms behaviors and color. schemes.

Marquee Section: hides Marquee Bar

<u>Current Color Scheme</u> allows you to chose between Dark or Light color scheme

<u>Accent Color</u> customizes the color of the widget header bars

Profile	Trading Accounts	Trading	Layout Settings	Personalization
Marque				
🗹 Sha	ow Marque			
	lor Scheme			
Dark Them	e 💌			
Accent Col	or			
Widget'	s Header			
Behaviour				
	ow confirm dialog on tabs	and widgets	removal	
	to renew user session			

Behavior allows you to enable or disable confirmation popups when tabs and widgets are added or removed, and to enable or disable autorenewal of the session (if it is disabled, the session will be active for 30 minutes, after which it will shut down unless you choose to renew it by clicking "ok" on the popup window).

Marquee Settings

Lightspeed Web & Mobile's Marquee streams security information in the most flexible real-time quote displays. With Lightspeed Web & Mobile's Marquee, you can combine real-time data of securities in a variety of customizable displays. The content of Marquee can be customized in three different models.

<u>**Positions:**</u> Marquee that shows updated quotes of current positions.

<u>Watchlist:</u> Marquee that shows updated quotes of current Risers and Fallers

<u>**Custom:**</u> Customize marquee that shows updated quotes of your specifically preferred symbols

Tabs

Lightspeed Web & Mobile's interface is designed to make it easy for users to find features, place and organize widgets as they want. Each tab is customizable and can contain any component the user chooses from our widget list. By scrolling the drop-down menu of "Add Widget", click on the desired widget and it will be automatically added to the tab menu. You can also create and add extra tabs and label them to break down your trading tasks into simple actions.

Link Settings

Lightspeed Web & Mobile allows you to Link Widgets by Color such as news, charts, stock info and more to make your terminal more practical and efficient. To link windows on your screen change the Link box on each Widget you would like to link to the same color. After linking windows to a watchlist you can easily click a symbol in the watchlist, and every window linked by that color will change to the same symbol. You can also link other windows on your layout by changing their Link box to a different color.

Lightspeed Web & Mobile comes with a variety of widgets that you can use to get the most productive trading experience. The goal behind the "Add Widget" tab is to make sure there is a place

where you could always have easy access to all trading tools. Lightspeed Web & Mobile's widgets appear on the right-hand side of the platform and are always there no matter what tab you are on. If you don't want them taking up space, you can always collapse them by clicking "Lock Layout".

Unlocked Layout Mod:

Green highlights are accessible in this mode to add, move, and delete widgets as well as add, rename, and remove tabs

Locked Layout Mod:

Following Options are hidden/disabled - add and delete widgets

- move and resize widgets
- add, rename, and delete tabs

Account Info

Lightspeed Web & Mobile's account information is designed to display the user's real-time information about all trading activities, account value, buying power and more.

Charts

Use the Add Widgets function to pull up a basic chart where you can enter basic chart parameters such as symbol, time period and chart type.

Chart Settings

B Chart Type: To view the market from nearly every conceivable angle, we offer different chart types that stream up-to-date data. You can choose from the following different types:

• Area	• Line
• Candle	• OHLC (open-
• Sticks	high-low-close)
• Bar	• Table

- C <u>Indicator:</u> Scroll down to choose the technical indicators you need to use
- Compare: Compare the performance of different ticker symbols
- E Fold & Unfold: Fold and unfold the chart menu items

Charts (cont'd)

Geometrics (Drawing Tools)

The drawing tools can be accessed through the Geometrics menu which allows the user to select from several different drawing tools. Drawing tools overlap the price data and can be used to mark the charting area to help you find trends or note support and resistance levels in stock prices. Fibonacci, trend lines, support or resistance (price range) and text notes are a few available.

Charts (cont'd)

Edit Chart Settings

Click on the Settings

within a chart to pop-out settings boxes to adjust colors, edit and personalize your charts.

Filtering Orders

Orders can be filtered by Symbol, Order Status, Order Type, and Duration.

Duration means how long an order will remain in the market until it is canceled. Users can set their preferred duration from the Trade Ticket and Option Ticket widgets or popups.

Day: A day order automatically expires at the end of the regular trading session if it has not been executed.

GTC: Good till canceled is an order that remains open until it is filled or canceled by the user.
