### **How do I download the version?**

Visit our website to download the latest version of Sterling LST.

### **What are the changes in this version besides general optimizations?**

Options order entry to use L1 quote.

Add right click menu "Add Mock Position" to watchlist.

Add right click menu "Copy" to option chain window for easier option symbology.

### **Debug**

- Fixed COE bottom right corner inside market stale data display.
- Fixed Colorized fields.
- Margin updates intraday on symbols may not get BP updated if symbol is already initialized in layout (ie, watchlist).
- Fixed option chain flashing.
- Fixed Peg custom orders crashing due to uninitialized symbol.
- Fixed index options strike price scrolling.
- Fixed COE addressing unsubscribing mouse input crash.
- Command and small popup cleanup updating the registering and deregistering of display elements.
- Fixed hot key or hot button without an initialized symbol sending to custom route.

### **Optimizations**

- Test mode fixed manual executor price marking on market orders.
- Volume decimal point was displaying at the end with no zeros.
- Fixed mock trades in positions window in single account mode.
- Added application name to logs and Version.txt
- Changed Level2Count key from Int to Long to address large 32 bit integers.
